LOCAL CENTRE ZONE - LCZ

Overview and Purpose

The Local Centre Zone is located around the central commercial area in Matura. The purpose of the zone is to provide a small commercial and service centre for the local community. The *structure* of the local centre zone is similar to the town centre zone, but on a scale appropriate to the local catchment that will not detract from the Gore town centre.

The zone objectives, policies and rules provide the framework for managing the *effects* of development and ensuring the provision of a vibrant high quality commercial area, with a range of *building* scales and activities, and where the heritage, character and *pedestrian* amenity is maintained or enhanced.

The zone will enable a broad range of commercial, community and hospitality activities to establish in the centre to provide goods and services for the local community. The centre zone provides for different types and scale of *commercial activities* and *commercial service activities*, that range from fine grain retail through to larger format. Although some of the larger scale activities may require *vehicle access* and parking, the built form of the town centre is managed to be *pedestrian* orientated. On-site parking and loading is not required, but where provided these spaces should not dominate the streetscape. Outdoor storage is also restricted and *commercial activities* that require large areas of outdoor storage or are *yard* based are discouraged in the Local Centre Zone.

Residential or accommodation activities and offices provide for urban living opportunities and places of employment. These activities contribute to and support the viability and vibrancy of the local centre but need to be appropriately located so that they complement rather than compete with *commercial activities*. These activities also have the potential to detract from the commercial character of the streetscape, in particular along the *pedestrian frontages* of the core which are characterised by fine grain retail.

The local centre adjoins the statutorily acknowledged Maitava River and the nearby Maitava Falls/Te Au Nui Pihapiha Kanakana that are significant natural features of the District, and of particular cultural importance to Ngāi Tahu. The proximity and connection to the *river* is an amenity feature for the centre that could be enhanced.

Core Precinct (PREC4)

The Core Precinct of the Local Centre Zone encompasses the central shopping area around Bridge Street. The purpose of the precinct is to provide a focal point for the centre, where most of the fine grain retail and *pedestrian* activity is centred, and where the streetscape has a *historic character* with a number of scheduled heritage *buildings*. Specific design provisions apply providing for the amenity of a *pedestrian* orientated streetscape to be maintained or enhanced. The built form in the core precinct is also managed to maintain or enhance the look and feel of the historic streetscape character.

The objectives, policies, and rules specific to the Local Centre Core Precinct apply in addition to the provisions of the underlying Local Centre Zone. Where there is any conflict between the provisions the Precinct provisions shall prevail.

Objectives

- LCZ-O1 Activities within the Local Centre Zone provide for and encourage a range of commercial and community activities to support the needs of the Maitava community.
- LCZ-O2 The activities within the Local Centre Zone contribute positively to the heritage, cultural identity, vibrancy, sense of community, sustainability and resilience of Maitava, and the *adaptive re-use* of existing *buildings* is encouraged.
- LCZ-O3 The Local Centres Zone does not detract from, or undermine, the vibrancy and functionality of the Town Centre Zone.
- LCZ-PREC4-O1 The Local Centre Core Precinct is a vibrant *pedestrian* orientated attractive streetscape that provides a fine grain retail experience, where the amenity, heritage values, *historic character* and appearance of the Local Centre is maintained or enhanced.

Policies

- LCZ-P1 Enable a range of commercial and community activities that contribute positively to the vibrancy, amenity and character of the local centre, including commercial operations or community uses that require larger floorplates and/or *vehicle access* in the areas outside the Local Centre Core Precinct.
- TCZ-P1 Provide for medium density residential and accommodation activities within the Local Centre, where *residential units* are located above ground floor or the rear of *sites*, *outdoor living space* is provided, and units have *acoustic treatment* so that *reverse sensitivity effects* are managed in

relation to surrounding activities.

- LCZ-P2 Provide for built development in the Local Centre that:
1. contributes to a positive *pedestrian* experience and an attractive streetscape through *building* design, orientation and screening or landscaping;
 2. is of an appropriate scale, design and proportion to be sympathetic to heritage values and to the surrounding residential *environment*;
 3. promote the *adaptive re-use* of existing *buildings*;
 4. do not require large areas for outdoor storage of goods or materials;
 5. provides for a safe *pedestrian* traffic *environment* through the design and location of any parking areas and *vehicle access*; and
 6. responds to the underlying relationship Ngāi Tahu hold with the natural *environment* recognises and incorporates Ngāi Tahu history and association with Mātaura and the Gore area in building layout and design and maintenance of greenspace.
- LCZ-P3 Provide opportunities for enhanced public *access* to the Mātaura River through the provision of *esplanade reserves* at the time of *subdivision*, and have appropriate *setbacks* to waterways to maintain and enhance their amenity, environmental, and Ngāi Tahu cultural values and natural character.
- LCZ-P4 Enable the use of reserve *land* where the activity and / or development is consistent with the relevant Reserve Management Plan.
- LCZ-P5 Encourage the urban design of a streetscape, with *land transport infrastructure* such as *street furniture* and artwork, that contributes to the unique Ngāi Tahu cultural identity of the district.
- LCZ-P6 Manage on-site *car parking activities* so that these do not detract from the *pedestrian* orientated streetscape, and ensure that these spaces are attractive and safe by their design, layout, visual integration and relief.
- LCZ-P7 Manage activities which are potentially compatible with the purpose and predominant character of the Local Centre Zone having regard to whether:
1. the activity will improve community access to goods, services or *community facilities* and provide for the community's social and/or economic needs;
 2. the activity intensity and scale compromise enabled activities in the zone;
 3. the scale, design and layout of the activity is compatible with the character and amenity of the centre;
 4. the design and location of any parking areas, *vehicle access* and servicing arrangements maintain streetscape amenity and do not compromise *pedestrian* safety;
 5. there is adequate existing and/or planned *infrastructure* to service the activity;

6. the compatibility with surrounding activities, including *reverse sensitivity effects* and the potential conflict with and proximity to the residential zone;
7. the activity compromises the vitality and functionality of the Town Centre Zone.

LCZ-P8 Avoid activities establishing in the local centre that are:

1. incompatible with the anticipated purpose, character and *amenity values* of the Local Centre Zone; or
2. which do not contribute positively to the vibrancy of the local centre such as:
 - (a) storage; or
 - (b) activities that have a *yard* requirement; or
 - (c) manufacturing components; or
 - (d) have the potential to cause objectionable or noxious *effects*.

LCZ-PREC4-P1 Enable a range of small scale commercial, hospitality and community activities that contribute positively to the vibrancy of the Local Centre Zone and fine grain retail experience at the *pedestrian* focused core.

LCZ-PREC4-P2 Enable a mix of compatible activities that are not service or retail focused to locate in the upper levels of *buildings* on *pedestrian frontages* within the Local Centre Zone to contribute to the vibrancy of the centre.

LCZ-PREC4-P3 Manage *demolitions*, new *buildings*, and *alterations* and *additions* to the façade above the veranda within the Local Centre Core Precinct to ensure:

1. *buildings* and features that contribute to *historic character* of the streetscape are retained;
2. sympathetic work that is in response to a *natural hazard* and health and safety risk, such as earthquake strengthening are provided for;
3. development is sympathetic to the *historic character* of the local centre and the heritage values of any adjoining scheduled *heritage item*.

LCZ-PREC4-P4 Require *buildings* within the Local Centre Core Precinct to contribute to a vibrant retail area and provide for a high amenity *pedestrian* streetscape through *building* orientation and design by ensuring:

1. active *building* frontages with a high degree of intervisibility and connection to the street are provided;
2. public *pedestrian access* is provided from the front and service areas to the rear;
3. *vehicle accesses* are excluded from *pedestrian frontages*;
4. continuous verandas are provided for shade and weather protection.

LCZ-PREC4-P5 Avoid activities within the Local Centre Core Precinct that require larger floorplates, outdoor storage or are vehicle orientated, including

avoiding any *vehicle access* on to *pedestrian frontages* or *on-site car parking activities*.

Outdoor storage of goods and materials

All Activities excluding Residential Activities

1. Outdoor storage of goods and materials must not:
 - (a) encroach on required loading areas or landscape areas.
 - (b) exceed a *height* of 2 metres.
 - (c) exceed 20 percent *site coverage*.

Activity status where compliance is not achieved:

Restricted Discretionary.

Matters of discretion:

1. Any adverse *effects* on the streetscape or public spaces.
2. The location, bulk and scale *effect* on the character and amenity of the adjoining *sites*.
3. The visual *effects* and, the extent of screening and landscaping.
4. The *effect* on the movement of people and vehicles on the *site*.
5. Safety issues.

Outdoor living space

Residential Activity

1. Each *residential unit* at ground floor level must provide:
 - (a) a minimum continuous area for *outdoor living space*, contained in one area, within the *net site area* of the *site*, of 20m² which:
 - (i) has a minimum 3m diameter circle; and
 - (ii) is directly accessible from a *habitable room* within the *residential unit*; and
 - (iii) does not face south; and

Activity status where compliance is not achieved:

Restricted Discretionary.

Matters of discretion:

1. Whether sufficient *outdoor living space* is provided.
2. Accessibility and convenience for residents;
3. The proximity of alternative opportunities for outdoor amenity and recreation;

(iv) is kept free of *buildings*, *access* areas (including driveways and manoeuvring areas) and parking spaces.

2. Each *residential unit* above ground floor must provide:

- (a) a minimum continuous area for *outdoor living space*, contained in one area, within the *net site area* of the *site*, of 6m² which:
 - (i) has a minimum 2 metre dimension; and
 - (ii) is directly accessible from a *habitable room* within the *residential unit*; and
 - (iii) is not south facing.

4. The reason for the reduced *outdoor living space*.

LCZ-S10

Density

Residential Activity

- 1. *Residential units* must not exceed a minimum density of one per 150m² of *net site area*.

Activity status where compliance is not achieved:

Restricted Discretionary

Matters of discretion:

- 1. Whether the activity contributes positively to the vibrancy of the local centre.
- 2. The urban quality and commercial character of the streetscape.
- 3. The nature, location and design of the existing development and the ability to reuse and adapt the *building* for a variety of activities.
- 4. The nature and location of surrounding development and the compatibility with the context of activities in the surrounding area, including the potential for *reverse sensitivity*.
